

WARRANTY

We are providing the following warranty in addition to our general conditions of sale (in accordance with Orgalime S 2012) for the PE-RT pipe, which we manufacture.

The PE-RT pipes, which we manufacture according to EN ISO 22391, are made from a Medium Density Polyethylene of Raised Temperature Resistance.

We hereby represent and warrant that we, directly or through our parent Company, will maintain a proper General Liability and Product Liability Insurance and upon request will present an Insurance Certificate from our Insurer.

In addition, we will provide new pipes in exchange for any pipes damaged or broken due to defective material or our own production errors, should such damages or defects occur within ten (10) years from the date of manufacture of the relevant pipe.

Any use of any other pipe in conjunction with PE-RT pipes manufactured by LK Pex will render this warranty invalid.

This warranty will not apply to damages or defects arising from incorrect storage of pipes or other equipment, failure to install the pipes in accordance with generally accepted procedures or procedures specifically recommended by LK Pex, operation of systems outside specified parameters or the improper or non-professional installation. Specifically, the incorrect protection of the PE-RT pipes from ultra-violet radiation will render this warranty invalid.

Notice of any damages or defects must be given to LK Pex in writing within seven days of discovery, specifying the location of the pipes. LK Pex must be given the opportunity to inspect the pipes and test the system before any replacement of pipes or remedial work is accepted. The customer must also take any necessary action to limit the damage immediately upon discovery.
