

Quality and Environmental Policy

LK Pex develops, manufactures and sells high-quality plastic pipes for the heating and plumbing industry.

By continuously improving our products, processes and business systems we increase our competitiveness. We shall meet or exceed our customers' expectations, fulfil requirements applicable to our business as well as be responsive to the needs of other interested parties. Our employees are our greatest asset in achieving our objectives and we continuously develop the skills of our organization.

In all of our business, we strive to reduce our environmental impact by selecting and using our resources in an efficient and sustainable manner.

Fredrik Simonsson, Managing Director
LK Pex AB
